

Dear FCC,

Please do not override Wisconsin's "no call" law. Since it has been in place, I have been able to sit through lunch and dinner without any intrusive telemarketers interrupting, just like the "good old days". Several times prior to Wisconsin's law I have received calls where I could not break the connection until their spiel was completed. During one of these calls I was waiting for an important return call from my doctor. Wisconsin's law is a good law and does not need Federal interference.

THANK YOU
